1. Corporate Information and Going Concern

Corporate Information

NuLegacy Gold Corporation (the "Company") is a publicly listed entity on the TSX Venture Exchange (the "Exchange") and incorporated under the laws of the Province of British Columbia. The Company's principal business activity is the acquisition and exploration of mineral properties. Its principal mineral property interests are located in Nevada, USA.

The head office, principal address, and records office of the Company are located at 1055 West Hastings Street, Suite 300, Vancouver, British Columbia, Canada, V6E 2E9.

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The Company's mineral property interests are located outside of Canada and are subject to the risks associated with foreign investment, including increases in taxes and royalties, renegotiations of contracts, currency exchange fluctuations and political uncertainty. Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory requirements.

Going Concern

These condensed interim consolidated financial statements have been prepared assuming the Company will continue on a going-concern basis. The Company has incurred losses since inception and the ability of the Company to continue as a going-concern depends upon its ability to raise adequate financing and/or to achieve profitable operations. These condensed interim consolidated financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

The continuance of the Company's operations is dependent on obtaining sufficient additional financing in order to realize the recoverability of the Company's investments in exploration and evaluation assets, which is dependent upon the existence of economically recoverable reserves and market prices for the underlying minerals. Management closely monitors commodity prices of precious metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company if favorable or adverse market conditions occur. The Company believes it has sufficient working capital to maintain operations for the next 12 months.

2. Significant Accounting Policies

The following is a summary of significant accounting policies used in the preparation of these consolidated financial statements.

Statement of compliance

These condensed interim consolidated financial statements have been prepared in accordance with International Accounting Standard 34 ("IAS 34") "Interim Financial Reporting", using accounting policies that are consistent and in accordance with the International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

These condensed interim consolidated financial statements, including the comparative amounts, were approved and authorized for issue by the board of directors on November 27, 2017.

Basis of presentation

The condensed interim consolidated financial statements have been prepared on a historical cost basis, except for cash and cash equivalents and other financial instruments classified as fair value through profit or loss and available for sale that have been measured at fair value at the reporting date. The condensed interim consolidated financial statements are presented in Canadian dollars unless otherwise indicated.

The accounting policies applied in preparation of these condensed interim consolidated financial statements are consistent with those applied and disclosed in the Company's consolidated financial statements for the year ended March 31, 2016, with the exception of certain amendments to accounting standards issued by the IASB, which were applicable from April 1, 2016. These amendments did not have a significant impact on the Company's condensed interim consolidated financial statements.

The Company's interim results are not necessarily indicative of its results for a full year.

The Company's management makes judgments in its process of applying the Company's accounting policies in the preparation of its unaudited condensed interim consolidated financial statements. In addition, the preparation of financial data requires that the Company's management make assumptions and estimates of the effects of uncertain future events on the carrying amounts of the Company's assets and liabilities at the end of the reporting period and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates as the estimation process is inherently uncertain. Estimates are reviewed on an ongoing basis based on historical experience and other factors that are considered to be relevant under the circumstances. Revisions to estimates and the resulting effects on the carrying amounts of the Company's assets and liabilities are accounted for prospectively. The critical judgments and estimates applied in the preparation of the Company's unaudited condensed interim consolidated financial statements are consistent with those applied and disclosed in Note 2 to the Company's audited consolidated financial statements for the year ended March 31, 2017.

Basis of consolidation

These condensed interim consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, NuLegacy Gold N.V., which was incorporated in Nevada, USA. The subsidiary is fully consolidated from the date of acquisition, being the date on which the Company obtains control, and continues to be consolidated until the date when such control ceases. The financial statements of the subsidiary are prepared for the same reporting period as the parent company, using consistent accounting policies. Inter-company balances and transactions, including any unrealized income and expenses arising from inter-company transactions, are eliminated in preparing the condensed interim consolidated financial statements.

Significant accounting judgments, estimates and assumptions

The preparation of the consolidated financial statements in accordance with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported expenses during the year.

Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectation of future events that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

The most significant accounts that require estimates as the basis for determining the stated amounts include the valuation of share based compensation and income taxes.

Critical judgments exercised in applying accounting policies that have the most significant effects on the amounts recognized in the consolidated financial statements are as follows:

(a) Economic recoverability and probability of future economic benefits of exploration and evaluation assets:

The application of the Company's accounting policy for exploration and evaluation expenditure requires judgment in determining whether it is likely that future economic benefits are likely either from future exploitation or sale or where activities have not reached a stage which permits a reasonable assessment of the existence of reserves. The determination of a resource is itself an estimation process that requires varying degrees of uncertainty depending on sub-classification and these estimates directly impact the point of deferral of exploration and evaluation expenditure. The deferral policy requires management to make certain estimates and assumptions about future events or circumstances, in particular whether an economically viable extraction operation can be established. Estimates and assumptions made may change if new information becomes available. If, after expenditures are capitalized, information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off in profit or loss in the period when the new information becomes available.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in material adjustments are as follows:

(a) Valuation of share based payments and warrants:

The Company uses the Black-Scholes Option Pricing Model for valuation of share based compensation and for the valuation of warrants. Option pricing models require the input of subjective assumptions including expected price volatility, interest rate, and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and the Company's earnings and share option reserves.

(b) Recovery of deferred tax assets:

Judgment is required in determining whether deferred tax assets are recognized on the statement of financial position. Deferred tax assets, including those arising from unutilized tax losses, require management to assess the likelihood that the Company will generate taxable earnings in future periods, in order to utilize recognized deferred tax assets. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realize the net deferred tax assets recorded at the reporting date could be impacted. Additionally, future changes in tax laws in the jurisdictions in which the Company operates could limit the ability of the Company to obtain tax deductions in future periods.

Comparative figures
Certain comparative figures have been reclassified to conform to the current year's presentation.

Standards issued or amended but not yet effective:
A number of new standards, amendments to standards and interpretations applicable to the Company are not yet effective for the six months ended September 30, 2017 and have not been applied in preparing these condensed interim consolidated financial statements:

- IFRS 9 – Financial Instruments: Applies to classification and measurement of financial assets and liabilities as defined in IAS 39. It is effective for annual periods beginning on or after January 1, 2018 with early adoption permitted. The Company does not expect any effect on the Company's consolidated financial statements.

(Expressed in Canadian dollars – Unaudited)

Standards issued or amended but not yet effective (continued):

- IFRS 16 – Leases: specifies how an IFRS reporter will recognize, measure, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognize assets and liabilities for all leases unless the lease term is 12 months or less or the underlying asset has a low value. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17. The standard was issued in January 2016 and is effective for annual periods beginning on or after January 1, 2019.

3. Available for Sale Financial Assets

In March 2014, the Company completed a share exchange financing transaction with Global Resources Investment Ltd. ("GRIT"), a U.K. based public company which trades on the London Stock Exchange ("LSE"), whereby the Company issued 20,000,000 common shares at a price of $0.16 per share ($3,200,000) in return for 1,731,200 GRIT common shares at a deemed issue price of £1.00 per share, equivalent to $3,210,510 on the transaction date. In July 2017, the Company exchanged its 1,731,200 GRIT common shares with another Company for 1,904,320 GRIT common shares which were subject to a transfer restriction. The transfer restriction expired in July 2017.

The fair value of GRIT common shares as at September 30, 2017 was $381,991 (March 31, 2017 – $320,672). During the six months ended September 30, 2017, the Company recorded a revaluation reserve gain on the investment of $61,319 (September 30, 2016 – $224,129) and an unrealized foreign exchange gain of $987 (June 30, 2016 – unrealized foreign exchange loss of $10,233).

There is a 3% finder's fee payable on the net proceeds from the future sale of the GRIT shares.

Iceberg Property
On September 16, 2010 (later amended on August 23, 2012), the Company entered into an exploration agreement with a joint venture election and option to purchase from Barrick Gold Exploration Inc. (“Barrick”) for a 70% undivided interest in 818 unpatented mining claims in the Iceberg Property located in Eureka County, Nevada, U.S.A. Under the amended agreement, the Company had to incur a minimum of US$5,000,000 in exploration or development expenditures on the Iceberg Property (inclusive of maintenance fees) by December 31, 2015. In September 2015, the Company completed this US$5,000,000 expenditure requirement and earned its 70% undivided interest in the property.

In February 2016, the Company entered into an exchange agreement with Barrick to acquire their 30% interest in the property. Pursuant to the terms of the exchange agreement, the Company issued 32,000,000 common shares (Note 9) to Barrick and granted a 2% net profits interest royalty from commercial production on the property. As a result of this transaction, the Company increased its working interest in the Iceberg Property to 100%.

Wilson Property

On October 18, 2010, the Company entered into a mining lease (“Lease”) with Idaho Resources Corp. (“Idaho”), in which Idaho granted to the Company exclusive possession and control to explore, develop, mine and operate on the Idaho Property, which consists of 482 unpatented mining claims.

On November 7, 2012 (later amended in January 2016), the Company entered into a restated mining lease whereby future requirements for exploration expenditures were eliminated. In order to maintain the Lease, the Company must make the following annual advance royalty payments:

- $75,000 of annual payments and issue 200,000 shares prior to execution of the restated mining lease (paid and issued);
- $25,000 payment and issue 100,000 shares on January 1, 2014 and January 1, 2015 (paid and issued); and
- $12,500 payment on January 1st, April 1st, July 1st and October 1st of all succeeding years (paid for the 2017 calendar year).

On July 9, 2017, the Company amended the agreement with Idaho. The quarterly payments of $12,500 due each year have been replaced with one annual payment of $15,000 due on January 1 of each year commencing on January 1, 2018. The amendment also includes a minimum exploration or development expenditure requirement of $150,000 each calendar year commencing in 2018 and in all succeeding calendar years until commercial production commences.

After an initial term of 10 years, the Lease will continue in full force and effect provided that the Company continues to maintain the property in good standing and make the requisite annual cash payments to Idaho. Upon commencement of commercial production, the annual cash payments will convert to an overriding royalty of 3% of the applicable royalty base on all gold, silver and other ores/metals from the property.

Fair value hierarchy

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments which are measured at fair value by valuation technique:

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.
Level 2: Other techniques for which all inputs have a significant effect on the recorded fair value that are not observable, either directly or indirectly.
Level 3: Techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

All financial instruments measured at fair value use level 1 valuation techniques in each period, being the closing bid price of the shares as quoted on a public exchange, or, where not quoted, as determined by the share of fair values of the underlying net assets of the investee.

The following table summarizes the classification of the Company's financial instruments within the fair value hierarchy at September 30, 2017:

	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total

Financial Risk Management

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Interest rate risk
- Foreign currency risk
- Other price risk

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk and the Company's management of capital. Further quantitative disclosures are included throughout these consolidated financial statements.

(i) Credit risk:

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company manages credit risk by placing cash with major Canadian financial institutions. Management believes that credit risk related to these amounts is nominal.

(ii) Liquidity risk:

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to liquidity risk is to ensure that it always has sufficient cash and credit facilities to meet its obligations when due, under both normal and stressed conditions, without incurring unacceptable losses or damage to the Company's reputation. Management typically forecasts cash flows for a period of six to twelve months to identify financing requirements. These requirements are then addressed primarily through access to capital markets. All of the Company's financial liabilities mature within one year.

(iii) Interest rate risk:

Interest rate risk is the risk of financial loss to the Company if market rates of interest were to change adversely. The Company's exposure to interest rate risk is not material.

(iv) Foreign currency risk:

Foreign currency risk is the risk that the future cash flows or fair value of the Company's financial instruments that are denominated in a currency that is not the Company's functional currency will fluctuate due to the change in foreign exchange rate.

The functional currency of the Company and its wholly owned subsidiary is the Canadian dollar. While the Company's parent is Canadian and its capital is raised in Canadian dollars, the Company conducts business outside of Canada. As such, it is subject to risk due to fluctuations in the exchange rates for the United States dollar and Euros. As at September 30, 2017, the Company has cash and cash equivalents denominated in US dollars of $8,338,486 (March 31, 2017 - $11,485,537), deposits in US dollars of $236,052 (March 31, 2017 - $238,205) and trade and other payables in US dollars of $38,068 (March 31, 2017 - $28,992). Each 1% change in the Canadian dollar versus the US dollar would result in a gain/loss of approximately USD $86,549 (March 31, 2016 – USD $7,611).

In addition, the Company holds an investment that is denominated in British Pounds (£). As such, it is subject to fluctuations in the exchange rates for the Canadian dollar and British Pounds. As at September 30, 2017, the Company has an available for sale investment denominated in British Pounds of £228,518 (March 31, 2017 - £192,596). Each 1% change in the Canadian dollar versus the British Pound will result in a gain/loss of approximately £2,285 (March 31, 2017 - £1,926).

(iv) Other price risk:

Other price risk is the risk that changes in market prices including commodity or equity prices will have an effect on future cash flows associated with financial instruments.

The equity price risk associated with the Company's current available for sale investment primarily relates to the change in the market prices of the investments in the portfolio. As at September 30, 2017, the Company owned 1,904,320 (March 31, 2017 – 1,731,200) GRIT common shares with each common share valued at £0.12 or $0.20 (March 31, 2017 - £0.085 or $0.15). Each £0.01 change in the value per common share will result in a gain/loss of approximately £19,043 or $31,832 (March 31, 2017 - £17,312 or $29,550).

12. Capital Disclosure and Management

The Company's capital management policy is to maintain a strong, but flexible capital structure that optimizes the cost of capital, creditor and market confidence while sustaining the future development of the business.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions. The Company's capital structure includes shareholders' equity of $26,052,195 (March 31, 2016 - $11,892,019). In order to maintain or adjust the capital structure, the Company may from time to time issue shares, seek additional debt financing and adjust its capital spending to manage current and projected debt levels. The Company is not subject to externally imposed capital requirements other than as noted above.

There were no changes to the Company's approach to capital management during the nine months ended December 31, 2016.
