NuLegacy Gold

CORPORATION

This presentation provides information in summary form, is not intended to be complete and may contain errors. No representation, warranty or guarantee of any kind, express or implied, is made as to the fairness, accuracy or completeness of information contained in this presentation including the accuracy, likelihood of achievement or reasonableness of any forecasts, prospects, results or statements in relation to future matters. NuLegacy is not liable to any recipient or third party for the use of or reliance on the information contained in this presentation.

This presentation also contains forward-looking information and statements under applicable securities laws, which information and/or statements relate to future events or future performance (including, but not limited to, the estimated length, width, thickness, structural and geochemical characteristics and prospective nature of identified targets and stratigraphic horizons including the Rift Anticline target and Wenban5 horizon anticipated results from future exploration and drilling programs and the number, location, timing and cost of proposed drill targets and surveys) and reflect management's current expectations and beliefs and are based on assumptions made by and information currently available to the Company. Readers are cautioned that such forward-looking information and statements are neither promises nor guarantees, and are subject to risks and uncertainties that may cause future results to differ materially from those expected including, but not limited to, actual results of exploration activities, environmental risks, operating risks, accidents, labor issues, delays in obtaining governmental approvals and permits, the availability of financing, market conditions, future prices for gold, changes in personnel and other risks in the mining industry. In addition, there is uncertainty about the spread of the COVID-19 virus and the impact it will have on the Company's operations, personnel, global supply chains, ability to access properties or procure exploration equipment and contractors on a timely basis and economic activity in general. There are no known resources or reserves in the Red Hill Property and any proposed exploration programs are exploratory searches for commercial bodies of ore. In addition, the presence of gold resources on properties adjacent or near the Red Hill Property including Goldrush is not necessarily indicative of the gold mineralization on the Red Hill Property. All forward-looking information and statements made in this presentation are qualified by these cautionary statements and those in our continuous disclosure filings available on SEDAR at www.sedar.com. The forward-looking information and statements in this presentation are made as of the date hereof and the Company does not assume any obligation to update or revise them to reflect new events or circumstances save as required by applicable laws.

Nothing in this presentation constitutes an offer to sell or the solicitation of an offer to buy any security and it is not intended to be relied upon as advice to investors or potential investors and does not constitute a personal recommendation or take into account the investment objectives, financial situation or needs of any particular investor.

Dr. Roger Steininger, a director of NuLegacy, is a Certified Professional Geologist (CPG 7417) and the qualified person as defined by NI 43-101, *Standards of Disclosure for Mineral Projects*, responsible for approving the scientific and technical information contained in this presentation.
