## THE NORTH & SERENA ZONES CONVERGING

~ 21.3 meters of 2.85 grams/t including 4.6 meters of 9.76 grams/t of gold ~

---

### To NuLegacy shareholders/stakeholders:

Hi Folks,

[+ To view today's new release](#)

Thanks to the foresight of our geo-technical team in permitting extra drill sites around the discovery hole (Serena17-01 with 50.3 meters (165 feet) of 1.00 grams/ton gold reported Jul 25) we drilled three follow-up holes commencing August 8<sup>th</sup>. and are now reporting the results on Sept 6th.

*"We are encountering more and more of the higher-grade 'cores' associated with these Carlin-type gold deposits that make them such [coveted prizes](#)", commented Dr. Roger Steininger, NuLegacy's Chief Geoscience Officer.*

We are awaiting assays from eight more wildcat holes drilled in various parts of the property targeting geophysical and geochemical anomalies.
