2017 EXPLORATION ACCELERATES

~ Three drill rigs turning on NuLegacy's Red Hill Project ~

To NuLegacy shareholders/stakeholders:

Hi Folks,

[+ To view today's new release](#)

As today's news release highlights, we now have three drills operating on the Red Hill Project to accelerate our 2017 program of expanding our two confirmed gold deposits, the [Iceberg](#) and [the Avocado](#), and developing and drill testing several new exploration targets, the [Deep Iceberg](#), [VIO and Jasperoid Basin](#) anomalies.

Figure 1- Drilling in the South zone, Iceberg deposit, May 15, 2017

As well we've received confirmation from McClelland Laboratories, one of Nevada finest analytical institutions, that the Iceberg Deposit's near-surface oxidized gold-bearing material has 'favorable leaching characteristics'.

Thank you and Cheers,

Albert

Albert J. Matter
